How to use this planner

A two-minute guide

1 Tabs on the right

Tap any tab to jump to that section. The house icon at the top of every page takes you back Home.

2 Undated

Nothing is pre-dated, so you can start any month of any year. Write your own dates on the calendar pages.

3 Index pages

Each section starts with an index page. Tap a card to open the page you need.

4 Digital use

Import the PDF into GoodNotes, Notability, Noteshelf, Samsung Notes, Xodo or any PDF app that supports links. Use 'Import' (not 'Open in') so the links keep working.

5 Printing

Use the printable version (US Letter or A4). Choose 'Fit to page'. Print only the pages you need.

6 Duplicate pages

Need more guest pages or notes? Duplicate any page in your app - the tabs keep working.
